US Citizen | (405) 446-6159 | ngu.calvin04@gmail.com | linkedin.com/in/thuan-ngu1

EDUCATION

University of Oklahoma

Bachelor's in Computer Science, Minor in Mathematics | 3.55 / 4.0 GPA

8/2023 - 12/2026

Norman, OK

RELEVANT EXPERIENCE

76th SWEG Computer Scientist Trainee

Tinker Air Force Base

05/2026 - 8/2026

Oklahoma City, OK

- Engineered test procedures for B-52 avionics and missile launch systems, analyzing MIL-STD-1553 bus data streams to verify ejector rack communications and flight hardware integrity.
- Developed C# route optimization algorithms for B-52 and Joint Mission Planning Systems (JMPS), streamlining automated flight path plotting and reducing mission planning calculation overhead.
- Architected a Java-based Portable Analysis Display (PAD) application to ingest and visualize live E-3 Sentry (AWACS) radar track telemetry, engineering coordinate transformation logic (lat/long) for spatial tracking.
- Modeled interactive 3D hardware components—including Transformer Rectifier Units—using Blender and Unity (C#) for KC-46/KC-135 Virtual Maintenance Trainers, elevating physical fidelity in aircrew training modules.
- Co-developed full-stack web utilities (GeoChat) and an "Alternative Topics" pub/sub module (Java/JavaFX) for the OPTIC traffic tool, while resolving production software defects in primary cockpit display suites.

Software Development Intern

Calvient Technologies LLC

10/2025 - 12/2025

Oklahoma City, OK

- Architected a modernized configuration dashboard using PHP, Laravel, TypeScript, and Chakra UI—building 3 core hub screens that consolidated 20+ settings to streamline navigation for 1,000+ healthcare providers.
- Engineered hierarchical routing and dynamic breadcrumb navigation across 100+ files and 10,000+ lines of code, reducing platform navigation complexity across a large-scale healthcare system.
- Authored and merged production-ready code across 3–5 PRs per sprint cycle, including early pre-internship user stories that accelerated overall feature deployment and delivery schedules.

Undergraduate Research Assistant

Sense|Base – University of Oklahoma

8/2025 - 10/2025

Norman, OK

- Assisted in designing experimental protocols and processing subject data using MATLAB and Java-based GUI, supporting a \$2,000 interdisciplinary study on spatial design's impact on human perception.

PROJECTS

OU ACM Website

4/2026

- Maintained and upgraded the OU ACM chapter web application using HTML, CSS, and PHP, streamlining executive roster management and dynamic event updates for student members.

University of Oklahoma, Hacklahoma: Career Elevation GPS

2/2026

- Architected a full-stack internship matching platform using Java (Spring Boot), PostgreSQL, React, and Tailwind CSS, engineering a skill-based progression algorithm demoed to live event judges.

TECHNICAL SKILLS

Languages: Java, C/C++, C#, Python, JavaScript, TypeScript, PHP, SQL, HTML/CSS, MATLAB

Frameworks & Libraries: React, Spring Boot, Node.js, Laravel, JavaFX, Tailwind CSS, Bootstrap

Developer Tools & Tech: Git, GitLab, Azure, Jira, Unity, Blender, PostgreSQL, MIL-STD-1553, VS Code, Eclipse, Cursor

LEADERSHIP EXPERIENCE

Student Association of Computing Machinery (ACM): Treasurer & Event Coordinator (Spring 2025 – Spring 2026)

Engineering Pathways Program: Student Mentor (Fall 2025, Fall 2026)

APIDA Leadership Conference: Student Mentor (Fall 2023 – Fall 2025)

AWARDS

University of Oklahoma Dean's Honor Roll: Spring 2024, Fall 2024, Spring 2025, Fall 2025, Spring 2026
